7060 2017

24/7/365 monitoring

10 years' peace of mind

When you buy a solar cell battery from XOLTA, you can extend your peace of mind by 8 years with a 10-year Peace-of-Mind Agreement

This 10-year agreement includes:

- Mandatory 2-year warranty period
- Onsite support: Visit and repair by an authorized installer at your home in the unlikely event the battery does not work optimally
- Automatic software updates: You always have a full overview of your battery's performance in terms of savings, CO2 and purchasing power from the grid
- Prepared for changes in net tariffs: Soon, your XOLTA solar cell battery will be able to use your stored electricity when it makes most sense in relation to future tariff increases
- Hotline: Call us at +45 7060 2017 from 9 a.m. - 4 p.m. on weekdays if you have problems with your battery
- 24/7/365 monitoring: Every day, around-the-clock, we monitor your battery to ensure optimal and safe functioning

During the 10-years of the Peace-of-Mind Agreement, you get expert support for your solar cell battery at no extra cost. XOLTA works only with authorized electricians who know our advanced products inside and out. No matter what happens to your battery, you will incur no additional charges during the agreement period.

Furthermore, you are assured that your solar cell battery is always up to date. Every day, we're working to increase the economic benefits of XOLTA's solar cell batteries.

XOLTA's Peace-of-Mind Agreement is one of the best on the market. You pay only 495kr/year for the BAT-5 and 595kr/year for the BAT-10, and you're covered from day 1. You are invoiced annually – initially, when you buy your battery and thereafter at the end of a year passed in the agreement. You cannot enter the agreement at a later point in time; it has to be done at time of purchase of the battery. You can always discontinue the agreement with one month's notice after the end of the current month. In that case you will be reimbursed for months already paid.

If you do not want XOLTA's Peace-of-Mind Agreement, you are of course covered by the 2-year, mandatory warranty period. Should you need support from an installer/electrician after this period, it will be invoiced at 750kr/hour + 3.5kr/km for driving. Islands must be connected to the mainland by a bridge.
